

Multi-unit rock glacier systems

Comment:

Rock glacier systems comprising multiple complex and spatially connected units (not depicted in detail).

The coalescence between the terminal units is limited to the feet of their frontal or lateral talus. Three distinct rock glacier systems can be distinguished.

Caucasus, Georgia
42.5663°N, 44.3332°E
2900-3200 m.a.s.l.
