

Spatial connection to the upslope unit / Glacier-connected

Comment:

Continuity glacier – debris-covered glacier (DCG) - rock glacier. The delimitation between the DCG and the rock glacier section is not feasible without further direct or geophysical prospection.

Nevado del Plomo,
Argentina
33.0755°S, 69.9261°W
4100-4500 m.a.s.l
