

Rock glacier activity / Relict

Comment:

Relict rock glacier units indicated by subdued topography and smoothed lateral and frontal slopes/margins. The apparent absence of vegetation (in this arid context) is not a criterion of rock glacier activity here.

Alto del Chacayal, Chile
33.3874°S, 70.0535°W
3100-3500 m.a.s.l.
