

# RoGI discussion topics

## Topic 1: Refinement and finalization of the RoGI guideline documents

- **Guidelines refinement:**
  - Are the key figures of the documents (consensus-based strategy, inventorying strategy and overview process) suitable?
  - Should they be adapted? And if yes, how?
  - Is there a figure missing?
- **Guidelines finalization:**
  - What should be the format of the final document (printed, online, report, paper, etc.)?
  - What should be the authorship strategy (consortium, names, editors, etc.)?
  - What should be the update strategy once the document is completed (regular updates every xx years, every time new comments, etc.)?
  - How can we make it visible, findable and usable (DOI, press release, etc.)?

## Topic 2: Implementation of the RoGI guidelines and exploitation of the data

- **Guidelines implementation:**
  - How to best implement the guidelines (training, tutorial, review process, etc.) for new and already existing inventories?
  - How to promote and coordinate the RoGI production in new areas (resources needed, tools, support, etc.)?
- **Data exploitation:**
  - How to evaluate the comparability of the RoGI products?
  - How to compare RoGIs?
  - What are the research questions and which analysis should be performed to answer them?
  - How to best exploit the produced RoGI?
