RGV discussion topics

Topic 1: Standard methodology to compute RGV from raw kinematic data

- **RGV Methodology:**
  - How do you usually proceed/which step do you follow with your data (selection, gap-filling, spatial-temporal averaging, etc.)?
  - Is the proposed procedure similar to yours/ is it suitable to your data?
  - How should it be adapted?
  - What is needed to make it operational (tools, definition, tests, etc.)?

Topic 2: RGV as climate change indicator and current knowledge gaps

- **Climate change indicator**
  - How to use RGV products in a climate-oriented perspective?
- **Knowledge gaps**
  - Which knowledge gaps still need to be filled to exploit RGV as ECV parameter?
  - Which research questions should be investigated in the future?
  - What are the research needs to fulfill the goals of RGIK (RGV as an ECV parameter)?
